GLORI ENERGY SELECTED AS FINALIST FOR THE WORLD PETROLEUM COUNCIL EXCELLENCE AWARDS  
Glori to present at the 21st World Petroleum Congress in Moscow on June 16.

HOUSTON — June 3 — [Glori Energy Inc.](#) (Nasdaq: GLRI) (“Glori”), an energy technology company, today announced it has been selected as a finalist for the [World Petroleum Council Excellence Awards](#) (“WPCEA”). Chosen from more than 100 nominated technologies, Glori’s AERO System has reached the final three in the “WPCEA for Technological Development” category.

[Stuart Page](#), CEO of Glori Energy, said: “We are pleased that Glori’s AERO System is being recognized for its technological achievements in biotechnology enhanced oil recovery. Presented every three years, the WPC Excellence Awards are well respected around the world. We look forward to attending the WPC Congress and are honored to be in the company of the other distinguished finalists.”

Mr. Page will present the AERO™ System at the [21st World Petroleum Congress](#) on Monday, June 16 at [Crocus Expo International Exhibition Center](#) in Moscow, Russia.

## ABOUT GLORI ENERGY

Glori Energy Inc. (NASDAQ: GLRI) is a Houston-based energy technology company known for its proprietary AERO™ System, a highly efficient, biotechnology process for increasing oil recovery from existing reservoirs. Only one-third of all oil discovered in a typical reservoir is recoverable using conventional technologies; the rest remains trapped. Glori’s AERO technology recovers trapped oil by stimulating a reservoir’s native microorganisms to sustainably increase the ultimate incremental recovery. Glori applies its technology to fields the company acquires and redevelops onshore in the U.S., and also provides its AERO System as a service to third party E&P companies. For more information, visit: [www.GloriEnergy.com](http://www.GloriEnergy.com).

## ABOUT WORLD PETROLEUM COUNCIL EXCELLENCE AWARDS

Every three years at the World Petroleum Congress, the World Petroleum Council recognizes some of the most outstanding projects and innovations in the oil and gas sector with the WPC Excellence Awards (WPCEA). The objective of the WPCEA is to distinguish companies, institutions or any public or private organization (not individuals) engaged in the oil and gas industry for promoting or operating with high excellence standards. Companies can submit projects to be recognized for technological development or social responsibility. For more information, visit: [www.21wpc.com](http://www.21wpc.com).

## FORWARD LOOKING STATEMENTS

Any statements contained herein which are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation, statements identified by or containing words like “believes,” “expects,” “anticipates,” “intends,” “estimates,” “projects,” “potential,” “target,” “goal,” “plans,” “objective,” “should”, or similar expressions. All statements by us regarding our possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives and similar matters are forward-looking statements. Glori gives no assurances that the assumptions upon which such forward-looking statements are based will prove correct. Forward-looking statements are not guarantees of future performance and involve risks, uncertainties and assumptions (many of which are beyond our control), and are based on information currently available to us. Actual results may differ materially from those expressed herein due to many factors, including, without limitation: the risk that any projections, including earnings, revenues, expenses, margins, or any other financial expectations are not realized; competition and competitive factors in the markets in which Glori operates; the expected cost of recovering oil using the AERO System, demand for Glori’s AERO System and expectations regarding future projects; adaptability of the AERO System and development of additional capabilities that will expand the types of oil fields to which Glori can apply its technology; plans to acquire and develop additional oil fields and the availability of debt and equity financing to fund any such acquisitions; the percentage of the world’s reservoirs that are suitable for the AERO System; the advantages of the AERO System compared to other enhanced oil recovery methods; and Glori’s ability to develop and maintain

positive relationships with its customers and prospective customers. Although Glori believes that the expectations reflected in such forward looking statements are reasonable, it can give no assurances that such expectations will prove to be correct. These risks are more fully discussed in Glori's filings with the Securities and Exchange Commission. Glori undertakes no obligation to update any forward-looking statements contained herein to reflect events or circumstances, which arise after the date of this document except as required by law.
